BACKDROP OF THE WORKSHOP

Education is an indicator for Social transformation in every Country. Twenty first century education is totally different from the previous centuries. The First among them is autonomy of Educational Institutions. India is a country where the meaning of educational autonomy is seldom understood and the concept rarely put to practice. Education for the last century was "Filling the Vessels" and now it is kindling the fire. It was formally retelling and now is Discovery. Last century adopted the policy of education as information transfer and now changed to 'Learning to Learn'. Formerly, it was 'Time based' and now 'Outcome based'. Former Philosophy of Education was memorization of discreet facts and now it is 'what students know and what they can do'.

The Educational leaders of our country are mostly unaware of these facts. Against this backdrop, Christ University is organizing a two day National Workshop on competency of Educational Leaders. The main objective of the workshop is to equip the Educational leaders to the new century Educational systems and practices.
