## Department of Psychology

### Clinical Neuropsychology Seminar Report

The Department of Psychology organised a guest lecture on Clinical Neuropsychology, on 1 September, 2016, with Dr. Jamuna Rajendran, Senior Consultant Neuropsychologist and her team of researchers, Dr. Niranjana Menon and Mohammed Afsar, for final year students of the masters program in Clinical Psychology. Dr. Rajendran spoke about the scope of Neuropsychology as a profession and what the field expected out of students as future torch bearers of the field.

While Dr. Jamuna gave us an overview of the field and spoke about the different dimensions of the field, her fellow speakers spoke more about the various neuropsychological assessments and how important neuropsychological rehabilitation was in recovery. Mr. Afsar gave a detailed presentation on the various neuropsychological assessment batteries that were available in India and the battery that was formed by NIMHANS. He also focussed on how clinical neuropsychologists had to deal with cases that came for consultation and the different levels involved in it.
