

# TEACHER FEEDBACK ON SYLLABUS

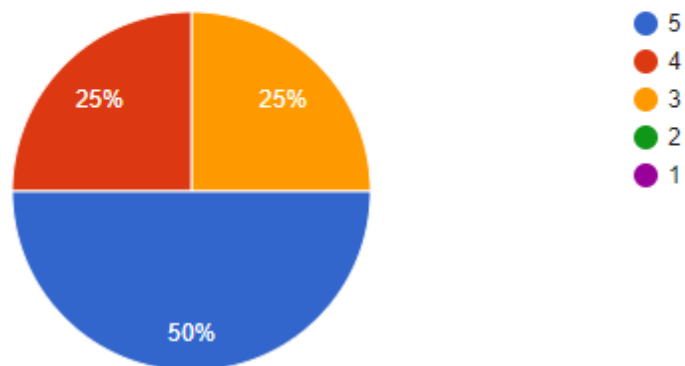

1. Does the curriculum satisfy the stated objectives and learning outcomes?

12 responses

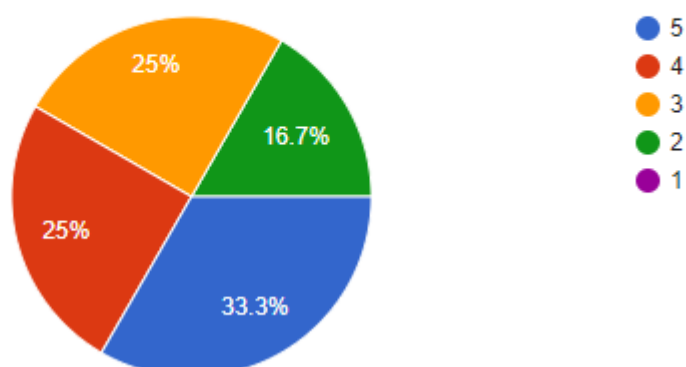

2. Do you have continuous processes to propose, modify, suggest and incorporate new topics in the curriculum?

12 responses

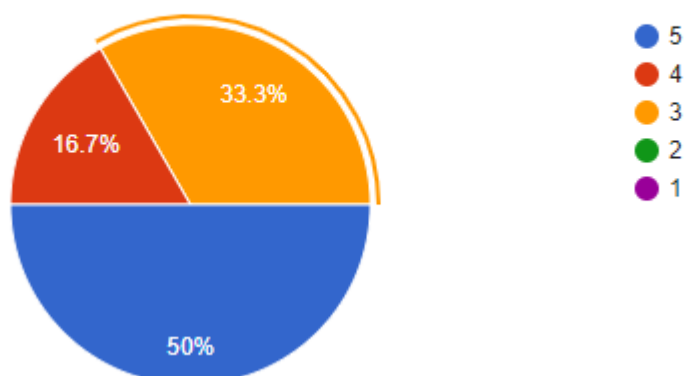

3. Is the curriculum effective in developing independent thinking?

12 responses

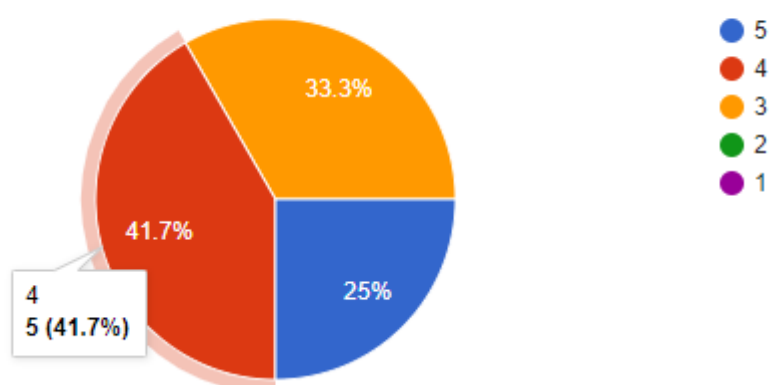

4. Does the departmental level expert committee meet to review the curriculum?

12 responses

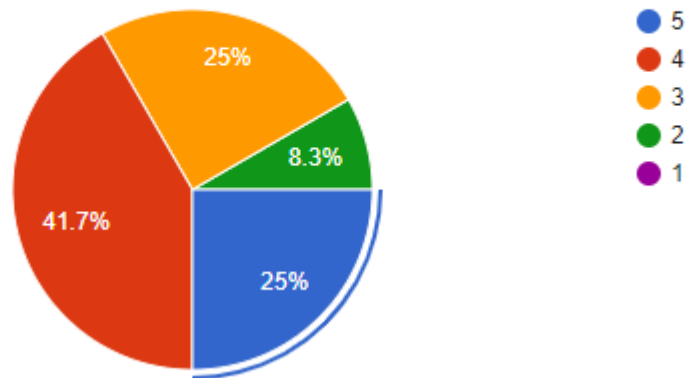

5. Does the curriculum enhance your knowledge in the subject area?

12 responses

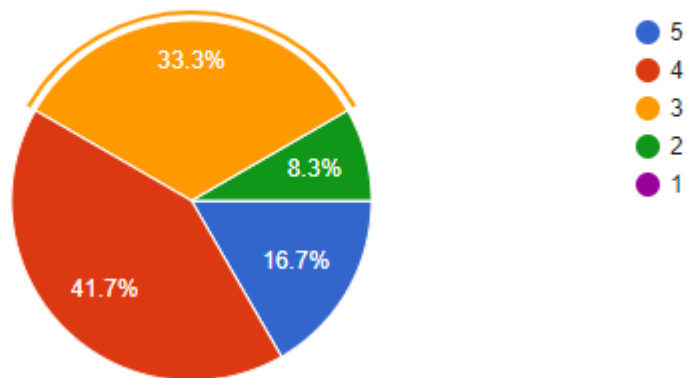

6. Does the curriculum enable the students to apply their knowledge in real life?

12 responses

7. Does the curriculum demand the teachers for research inclusive teaching?

12 responses

## General Comments and Suggestions:

12 responses

Syllabus needs to be skill based

Good

Syllabus is quite unique which helps the trainee teachers to become competent teachers.

As a team, deeper understanding of the syllabus keeping IB in mind has to be worked out.

It facilitates overall learning for faculty and students

BEd and PGDIE course curriculum structure and content is good for International Education studies

The curriculum will be require a change - Competency based curriculum

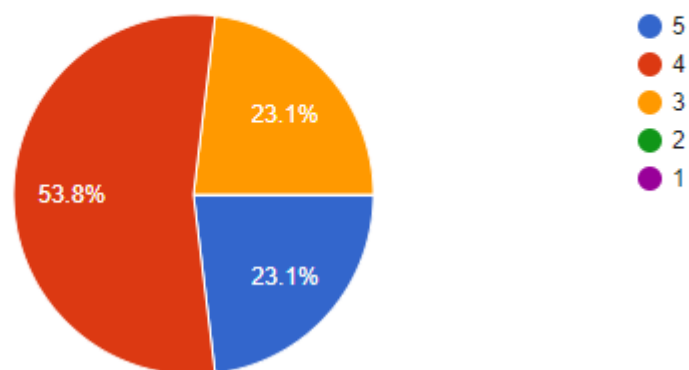

Question 7 is not clearly stated.

New relevant research topics need to be explored within curriculum. Subject areas like finance of educational schemes and its policy implications can be included.

## Industry Feedback on Syllabus

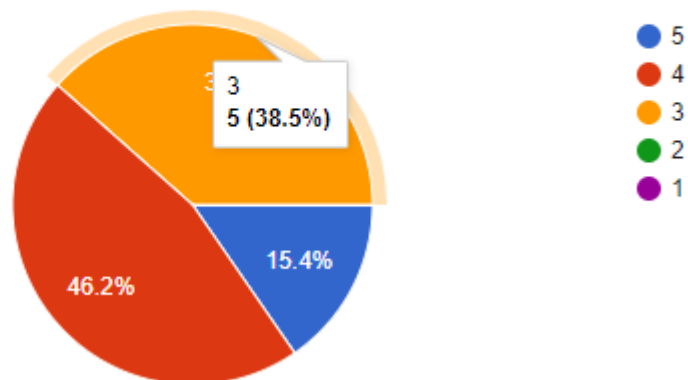

Is the curriculum aligned with the objectives of the programme?

13 responses

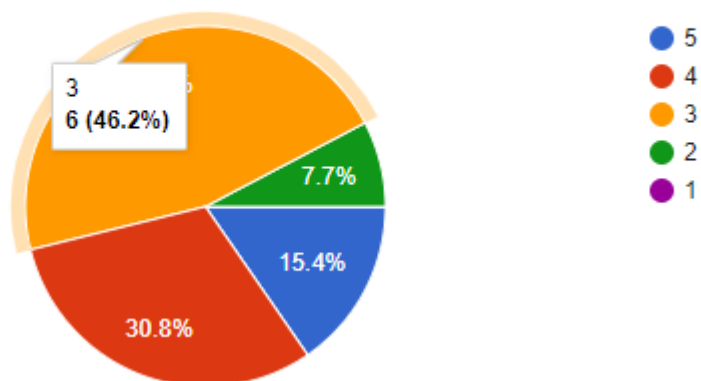

Does the curriculum cover advanced topics and current trends?

13 responses

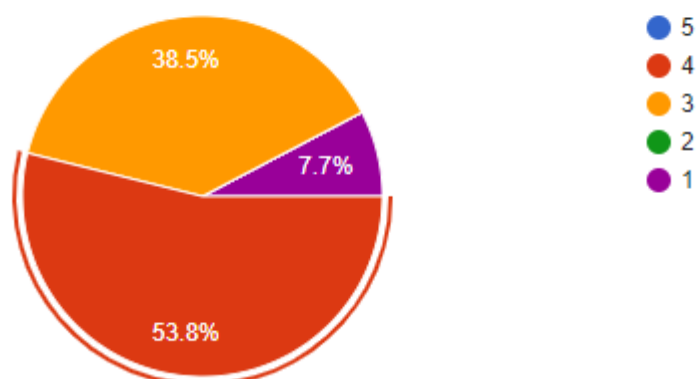

How would you rate the relevance of the electives offered in the curriculum?

13 responses

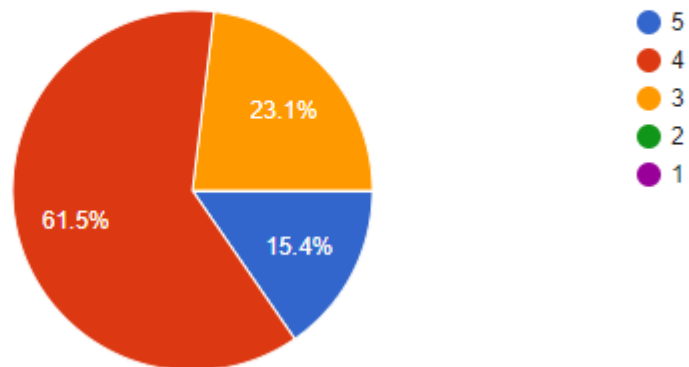

Is employability given weightage in the design and development of curriculum?

13 responses

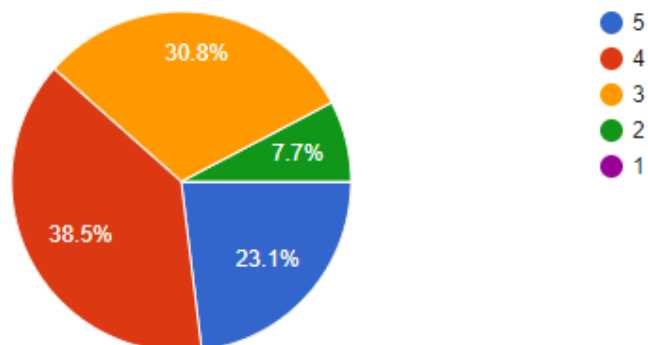

Does the curriculum meet the expectations of the industry?

13 responses

Does the curriculum cater to the enhancement of skills of the students with respect to the industry needs?

13 responses

## General Comments and Suggestions:

13 responses

well planned curriculum according to our syllabus

overall performance was good

Overall good n useful

The curriculum needs to be narrowed like a triangle. The basics of all subjects need to be taught at Primary and Middle School level, but the subjects need to be reduced at High School level so that students can enjoy and learn subjects that interest them and then perfect them at college level. This will drastically reduce the stress that students face in the tenth.

A comprehensive and holistic syllabus.

It was very good and the educational leadership paper helped me a lot

The Employee provided a better service and interaction with students is better

Your student intern was very good

Your student intern was very good

Overall the course is good and caters to the needs of the industry

Syllabus is satisfactory.

Satisfactory

Students who come here would always come with the appropriate instructions and the techniques to be implemented. When they come and take the classes or the sessions, in the institutions, they get to know their strengths and weaknesses, the crucial areas like time- management and the appropriateness of the content delivery. During the sessions, students ( not tge interns)don't ask questions and the process,teaching- learning sometimes becomes lopsided and students fail to face the unanticipated situations. More than the syllabus, how each institution provides its testing ground to the interns matters a lot.

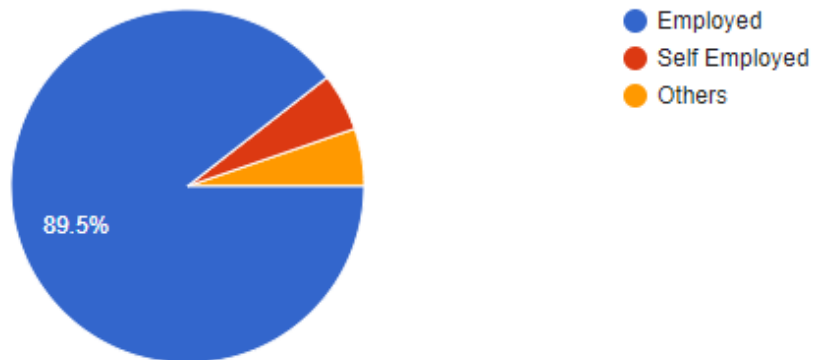

Regards

The syllabus should be more comprehensive with vocational courses introduced at school level.

No

SOE is doing great.

For PGDIE assignments need to be made more relevant, focused and engaging . An exercise to write EE and TOK essays followed by peer review may inform the students about DP core better .

Very appropriate for the

It was great studying at the Christ University. It never let us slow down or give up at any moment of life. Thank you.

Thank you for everything SOE

Thank you for all your efforts, dear teachers

Excellent Alumini meet. The current batch really put in a lot of effort to make this a memorable event

Well organised. Helped us cherish our memories

Really appreciate the quick update of curriculum towards online learning during the COVID19 pandemic. It is not just the curriculum but also the wide spectrum of opportunities provided at the University is helpful to make big strides.

Can share more practice knowledge to kids.

Wonderful Learning experience to excel

I had an enriching experience at Christ. I feel to be back again.

Being a part of SOE is my pride and the best decision I took to resume my education after 10 years, henceforth my perspective towards life is changed.. I really wish if SOE can conduct online or distance education/courses. I am thankful for each of my teachers. Lots of love and respect for my dear teachers without whom I wouldn't be the one I am today.

No.comments.

School of Education , Christ has provided with the best of experiences which has given me a strong foundation for my teaching journey. Now I would only have to go on building my blocks to achieve the rank of my dream of becoming a teacher of excellence.

Good Curriculum.

Christ University gives excellent exposure and relate with the new education policy and current education program.

Nil

Thank you for your co-operation

I think the curriculum could be more advanced for a B Ed programme.

.

NA

Overall an interactive and informative class

Good excellent

Good learning opportunities

None

Needs little bit of improvement in teaching strategy

Facilitating can be improved

Needs little bit of improvement in teaching strategy

Facilitating can be improved

IB and non IB should not mix. Keep the IB students and non IB separately. Why should Non IB students do all the IB requirements?

It would be better if the curriculum focuses more on developing the overall personality of the students rather than focusing only on getting marks in the papers.

Little pressurised by so tasks. But later on it is useful also

Good

The curriculum was appropriate with current needs and problem

Can improve a little

Better planning would help

The curriculum is really good, there must be moderation in instructions especially the core elements of the course

I find giving so much emphasis to certain courses make as necessary.

IB may be taught in a better way

For inclusive education, a practical approach from Drishti would have helped in a better way. Research methodology was taught in the 1st semester but spss was taught in last semester almost after the research project execution. If the sequence can be better organized it will help to imbibe research skills in a better way.

Curriculum is good but need to teach effectively all the subjects.

Good syllabus.

Suggest to give IB assignments only for the IB students.

It's overall a good course but there is a lot of stress due to over load of work

curriculum meets the expectations

A well planned curriculum

It was good

overall development of the individual is rendered in the program

Good experience

Overall perspectives of the students can be taken into consideration

I wish second semester had been more well planned. I understand classrooms were an issue during elective hours, but a lot of hours were wasted doing nothing when there was no elective hour. There should have been more classes allowed for EDU 233 while EE and CAS didn't require so many hours a week.

It was an enriching learning experience for me in B.Ed.

The curriculum in the 4th semester of B.ed needs to guide students towards focusing on the how to develop the overall personality of a student teacher rather than focus on the content of a subject. Give real life examples on how to deal with classroom behavior and management in school. Get a school teacher to give demo to take classes for student -teachers before they go out for internships in the 3rd Semester B.ed.

It was a great learning experience and I intend to apply the skills and knowledge learnt as applicable

curriculum will help the students to apply in their real life situations.

Zilch

If Research is mandatory include SPSS as mandatory subject to everyone and give more time on that. Guides should not show partiality to any one and they have to be available at any point of time. But overall including of Research in curriculum is a very good approach.it will help students who want to pursue higher education in future.

Nothing

I have learn more than I thought I should , However it is too hectic

PPT based approach towards teaching has to be reduced.

Extreme use of ppt can be reconsidered

It was good course

Good and brings open mindedness as teachers

Need of counseling for slow learner's

Need more active participation of few faculties. their sessions are really boring and monotonous.

time constraints to complete various topics

With the changing society and trend, this subject needs constant update. Though the content justifies in Indian scenario, the constant update here means addressing globally. This allows an individual to discuss and develop the content to further levels.

B. Ed helped me to explore new ways of teaching

An advanced level course

It was good. I have learned a lots about teaching & learning.

B.ed curriculum is good, but needs better training facilities for IB.

The staffs in the department can show some more efforts in understanding the difficulties faced by the students while chasing the deadlines. The University premises should be such that it makes the students feel they are studying in a college, instead of a school. Also the students' opinions should be taken into

Overall, the course is very apt and designed carefully to meet the ongoing trend in education.

Very carefully thought and designed syllabus. I enjoyed my learning and journey in B.Ed

Grateful for extra curricular activities outside the classroom and internship opportunities for professional development

The education imparted helped looked at the reality with different outlook

Thank you

Good it was helpful to curriculum enable the students to apply their knowledge in real life situations

Great curriculum. Helped me develop as a person.

The curriculum was very realistic and effective

The curriculum is worth in every phase.
