The five day digital workshop was designed to orient the faculty members of Monfort College to digital learning. The first day of the workshop began with an introduction to digital technology and its role in the classroom. It focused on the integration of digital tools in the classroom to facilitate learning. The sessions also focussed on different digital applications that teachers can use as teaching aids in their digital classrooms. The second day of the workshop emphasized the ideas of constructive alignment in higher education, pedagogy, and assessment in the digital classroom. It also oriented teachers on synchronous and asynchronous processes of teaching and learning and the ethics in online teaching and assessment. The third and the fourth days of the workshop focussed extensively on pedagogy and assessment. The emphasis was to equip faculty with ways to design course plans and execute these successfully in a digital classroom, and to adapt to assessment processes that are aligned with the teaching processes as well as are suited for the digital medium. The last day of the workshop provided the opportunity for participants to clarify their doubts and to further interact with the members of the Teaching Learning Enhancement Cell. All the sessions were hands-on and the participants were encouraged to engage in various activities related to the different sessions throughout the workshop. Participants were also awarded certificates on the successful completion of the workshop.
