

## **LABRINTH & WRIT (Women in Research and Information Technology)**

**-Presents Fedora Women's day**

A team which looks for equality in the society came up to the Christ campus to celebrate **Fedora Women's day** with our young girls to fill them-up with knowledge and confidence.

The speakers were from Pune as well as Bangalore. They were **Amita Sharma, Vipul Siddharth, Kanika Murarka, and Sarah Masud.**

The speakers knew how to interact as well as involve the audience as they spoke well on the topic and topics were **Fedora, Machine learning, data science and python pandas.** They presented the data in such a beautiful manner and gave everyone an equal chance by bringing them on stage and allowing them to overcome their stage fear. The confidence was very well visible in our little birds at the end of the session they could present their thoughts in their own manner with a bold mind.

These small-small opportunities will always help them in gaining something or the other, I Abhishek Rathi of 2BCA A thanks **LABRINTH & WRIT** on behalf of every participant for their wonderful arrangements as well as management.
