

# **School of Science**

**September 05, 2020**

According to the preference of Departments, a live-session/pre-recorded video was shared among the teachers. The contents of either mode will be more-or-less the same; however, the live sessions had some engaging activities for teachers rather than streaming video. There were some common contents included in all the pan-university level.

These included: - Christ Choir Performance - Teacher's day wishes message from Sonu Sood, a famous film icon The USC representatives from the School of Sciences also have included a personalized e-memento for all the teachers as a token of gift. This was also common to all the departments. Generally, the session was decided to be exclusive for the teachers.

The invitations to the sessions or the link of the pre-recorded video was shared with the teachers through official e-mail IDs.
