EVENT: Webinar on AI: Technology to change humanity

Report:

Artificial intelligence is based on revolutionary technologies around the world. Being regarded as the most influential human innovation, it is an important component of transforming human lives.
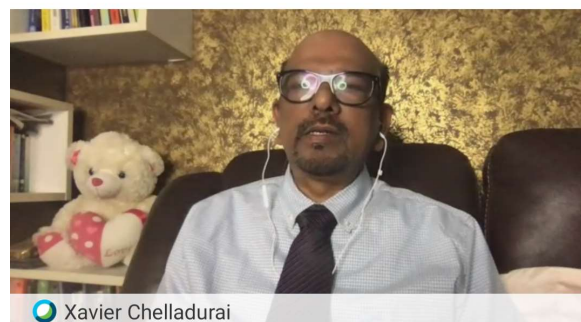

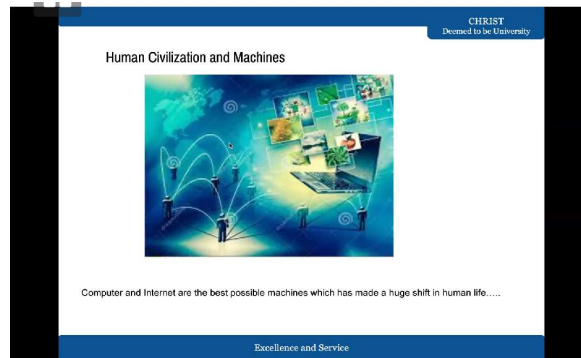

The webinar was conducted through an online platform, WebEx. The event commenced at 5:00 pm and around 118 participants had joined in to attend this event.

A general perception of what AI and its potential to transform humanity was presented. From talking about how technology evolved to the internalisation of AI in various fields, the session went on. Brief emphasis was laid on the 'The New Normal' which referred to the rise of artificial intelligence based systems. Various vast topics were introduced and explained with extreme dedication.

It was followed by a fruitful Question and Answer session.

The session ended at 6:20 pm, proceeding which feedback forms were distributed.
