EVENT: Webinar on "An Insight on Block chain Technology for the future"

POSTER:

Invitation Email:

Dear Christite,

Greetings from the Centre for Academic and Professional Support - CAPS.

Have you ever wondered what the new buzzword that every industry is talking about is? Is your database ready to be fed with the background of Bitcoins? Are you ready to step into the world of Blockchain technology? CAPS understands your thirst for knowledge about what is behind this currency. Thus, we invite you to join us in our latest webinar on "An Insight on Blockchain Technology for the Future" by the esteemed Dr. Cherukuri Ravindranath Chowdary of the Department of Computer Science and Engineering.

Having published articles in international journals and co-authored a book, Dr. Cherukuri Ravindranath Chowdary is currently a professor of Computer Science and Engineering at Christ University, Kengeri Campus.

The famed Bitcoins are built on top of Blockchain technology. It is a structure that stores transitional records of the public in several databases in a network connected through peer-to-peer nodes. It is a highly secured, decentralized and automated system, and we bring to you an opportunity to learn how this technology is the new revolution.
