

Management Development Programs for Educators

The Management Development Programmes (MDPs) for Educators, conducted from 22 August to 29 August 2025 across the BCC and BKC campuses, brought together CHRIST University leadership and faculty members and alumni to strengthen academic excellence and institutional innovation. Organized as a consultancy and collaborative initiative, the program focused on enhancing critical thinking, fostering a positive organizational culture, and equipping educators with contemporary knowledge and best practices in management education. It also promoted industry–academia collaboration and encouraged participants to identify opportunities for innovation and continuous professional development within the academic environment.
