

CHRIST (Deemed to be University)

Department of Computer Science

Write-up on the ecosystem created for innovations/ IKS/ incubation/ awareness of IPR

The Department of Computer Science at CHRIST (Deemed to be University) has actively contributed to building a robust ecosystem for innovation and entrepreneurship aligned with the Indian Knowledge System.

The incubation initiatives, has been instrumental in fostering an entrepreneurial culture among students by organizing impactful events such as masterclasses and an Idea Pitch Competition. These initiatives aim to identify and inspire students with a strong entrepreneurial mindset, guiding them in transforming innovative ideas into successful ventures.

Following this selection process, promising students are provided with continuous mentoring and comprehensive startup support throughout the year, enabling them to refine, develop, and scale their ideas into viable business models. These efforts are carried out under the aegis of the CHRIST Incubation Centre (CIC), which offers a dynamic and structured platform for aspiring entrepreneurs to thrive in the competitive business landscape.

At present, over 100 students from the Department of Computer Science are actively engaged with CIC in diverse roles such as University Representatives, incubatees, and interns. Their involvement not only enhances their practical learning experience but also contributes significantly to building a vibrant and sustainable entrepreneurial ecosystem within the university.
