One suggestion for improvement : It was classification heavy, and needs to be solution oriented for different class sizes.

The participants plan to apply the session insights by:

- Strengthening feedback practices through effective and structured methods of gathering and providing feedback.
- Promoting self, peer, and task-based feedback as integral components of the learning process.
- Orienting students on the purpose, value, and importance of self- and peer evaluation.
- Ensuring constructive and useful feedback by developing appropriate formats and mechanisms for collecting and delivering feedback.
- Translating the learning into classroom practice, with several participants planning to implement these approaches after the upcoming CIA III assessments.
