Synopsis of the activity (description)

Highlights of the activity	
Summary of the activity	<p>"The joy of the process minute by minute, hour after hour, day by day is the sublime path to true happiness". And that's what CCA is about - living the process. One such process was when 35 volunteers from THE ECO-SAVIOURS, a wing of CCA went to St Mary's Farm in order to get first-hand experience with planting seed balls, understanding the process of milking and pasteurization, learning about farming techniques and animal husbandry. The plan was specially curated so that students can fathom the interdependence of nature and mankind, how nature's blessing gets on to our plate every day and the mere palpability of mother earth.</p> <p>The plantation drive happened on 14th January and CCA happily reports that it was very successful event with a huge no. of volunteers and the coordinators. The seed balls comprising the seeds of Bougainville were planted and watered. More than 200 seed balls were dispersed around the farm. Students also got the opportunity to see the Aquaculture Pond, Cattle farm and milk processing unit, dairy farm, piggery etc.</p> <p>Overall, it was a great experience spending time with Nature.</p>
