Synopsis of the activity (description)

Highlights of the activity	Created awareness about the importance of the Wetlands and its Conservation
Summary of the activity	CCA (Christ for Climate) the only wing In CHRIST (Deemed to be University) which aims at environmental sustainability, time and again comes up with exciting events to spread the message loud and clear. And this time the team of CCA which broadly consists of team heads and volunteers came together to set up a beautiful stall by the central block aiming at creating awareness about wetlands covering both geographical and physical aspects of the landform. The inspiration for choosing an ecosystem of such sort was to highlight the importance of wetlands and stress how the life of different species is dependent upon their sustainability. For all those who are unaware, wetlands support more than 125,500 freshwater-dependent species. But due to rapid increases in temperature and climate change, some wetlands, including coral reefs, mangroves, swamps and those in high latitude and alpine zones, are especially at risk. This makes it all the more important for people to know what their carelessness and indifference are leading to the stall was set up on 2nd February 2023 with around thirty volunteers participating with full zeal and enthusiasm to lead the purpose of the event to fruition. The university students organized activities in the form of educational videos and games like dumb charades, twister and Jenga. The room was open for debate which enabled the college students to bring forth their ideas and also question their comrades on the same grounds. All the volunteers wore green in order to flow with the sentiment of the wing. It was a super dynamic stall where students learnt about 75 different wetlands in India and their significance. The stall winded up around 4 leaving all of us thrilled about the upcoming events.
