ABSTRACT

Entrepreneurship education is having a prominent part in both scientific and socially related education, where the students are imbued with basic knowledge on entrepreneurship. The entrepreneurial education is part of all major disciplines of education, which helps students to shape their careers based on their motives and interests. The study, therefore, aims to understand the impact of entrepreneurial education, entrepreneurial passion, and entrepreneurial mindset that is mediated by self-efficacy on entrepreneurial intentions of Engineering students. The survey methodology is adopted for the proposed research to collect primary data through a structured questionnaire via the judgment sampling technique to gather the data from the respondents. Thus, to achieve the results from the information collected, statistical tools such as descriptive statistics, normality analysis, differential analysis, regression analysis, and structural equation modelling are applied.

Key Words: Entrepreneurial education, Entrepreneurial mindset, Entrepreneurial passion, Entrepreneurial intention, self-efficacy.
